DETAILED ACTION

Claims 1-3,5-8,10-11,13-14,16 have been canceled. New claims 17-19 have been added.

Claims 4,9,12,15 and 17-19 are pending.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 15,19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zhang et al (already of record) which teach the following species according to the invention. Note that R4/R5/R3 are hydrogen; R6/R7/R1/R2 are Ome useful as a pharmaceutical. A newly discovered property does not render a compound unobvious if the claimed compound is structurally obvious from a prior art compound. A claimed compound that is structurally obvious from a prior art compound which has specific activity, is not unobvious due to the discovery that the claimed compound possesses an additional activity, because the compounds are already effectively placed in the public domain.

Art Unit: 1625

Claims 15,19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lewis et al which teach species according to the invention for the reasons mentioned supra. See RN 57986-73-9. The compound has a pharmaceutical use.

Claims 9,17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lewis et al which teach the species according to the invention for the reasons mentions supra. See RN 475-81-0 depicted below. The compound has a pharmaceutical use.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 9,12,15,17-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims use the language 'an ischemic disease'. However, from the specification it is clear that applicants' are treating --local ischemia--which results from a crisis situation. See for example paragraph 8. It is recommended that 'an ischemic disease' be replaced with ----local ischemia----.

Art Unit: 1625

Allowable Subject Matter

The prior art neither teaches nor suggests the compounds of claim 4. The data in the specification is noted at pages 10-12 which demonstrate the effectiveness in treating local ischemia.
